

AL FORD

AI & SaaS Product Builder | Technical Implementation | Financial Services Technology

North Carolina | github.com/ajford3866 | ajford3866.github.io

PROFESSIONAL SUMMARY

AI & SaaS product builder and financial-services professional transitioning into technical implementation, AI solutions, and software technology. Hands-on experience building a multi-tenant SaaS platform with Next.js, React, TypeScript, Supabase/PostgreSQL, role-based access control, CRM, scheduling, testing, and AI-platform foundations. Brings 8+ years of banking and customer-facing experience, including top regional performance at Wells Fargo, with a strong ability to translate business needs into practical technical solutions.

TECHNICAL SKILLS

AI & Automation: AI-assisted development • AI agent/workflow concepts • Prompt engineering • Tool calling • LLM application concepts

Frontend: JavaScript • TypeScript • React • Next.js • HTML5 • CSS3 • Tailwind CSS

Developing: Python • SQL • LLM APIs • Vector databases/embeddings • AI evaluation & observability

SaaS & Backend: Supabase • PostgreSQL • REST APIs • Authentication • RBAC • Multi-tenant architecture • Database design

Development: Git • GitHub • Vitest • Responsive design • API integration • Requirements definition

SELECTED TECHNICAL PROJECTS

BusinessPilot AI | *Founder / AI SaaS Product Developer*

2026 - Present

- Built a multi-tenant SaaS platform using Next.js, React, TypeScript, Supabase/PostgreSQL, and Tailwind CSS.
- Implemented authentication, role-based permissions, tenant isolation, audit logging, feature entitlements, and security-oriented application patterns.
- Implemented CRM foundations and calendar/scheduling workflows, including business hours, holidays, technician assignments, availability calculations, and appointment conflict prevention.
- Designed the AI Employee Framework, Business Memory concepts, tool-driven workflows, and product architecture for future AI-powered operations.
- Used AI-assisted development workflows while reviewing architecture, requirements, implementation decisions, testing, and product behavior.
- Designed future integration and automation architecture while keeping planned capabilities distinct from production-ready features.

Dragon Ball API Application | *Frontend Project*

2026

- Built an interactive JavaScript application that consumes a REST API to retrieve, search, sort, and dynamically display Dragon Ball character data.
- Applied asynchronous JavaScript, fetch(), DOM manipulation, responsive design, and Git/GitHub deployment practices.

Personal Developer Portfolio | *Frontend Project*

2026

- Designed and hand-coded a responsive developer portfolio using HTML and CSS to present SaaS, AI, and frontend project work.
- Published the portfolio with GitHub Pages and connected live project demos and GitHub repositories.

PROFESSIONAL EXPERIENCE

Wells Fargo | *Personal Banker / Relationship Banking*

2025 - Present

- Ranked #1 banker regionally while managing consumer financial relationships through consultative needs analysis and solution-based recommendations.
- Generated \$1.3M in new deposit dollars from new customers.
- Translate complex financial products, processes, and requirements into clear solutions while operating in a highly regulated environment focused on privacy, risk, security, and compliance.
- Apply relationship development, sales, customer experience, and business-process skills that transfer directly to technical implementation and solutions roles.

Truist | *First Client Solutions Specialist*

2018 - 2025

- Supported consumer and business banking relationships across financial transactions, service needs, and consultative customer solutions.
- Processed domestic and international wire transactions for consumer and business clients in a regulated environment.
- Identified operational and financial needs, resolved customer issues, and translated complex processes into practical next steps.
- Built deep experience in customer communication, needs analysis, risk awareness, and solution-oriented relationship management.

EDUCATION & TRAINING

Bachelor's Degree - Agribusiness & Economics

Frontend Software Development Training - HTML • CSS • JavaScript • React • APIs • Modern Frontend Development
